Dear Valued User:

We would like to inform you of an upcoming change regarding the appearance of our DAC Pro product, effective from March 2024.

Due to the discontinuation of the gold-colored capacitors by our supplier, Nichicon, we are required to make adjustments to ensure the continued availability and quality of our product. As a replacement, we have selected ELNA's premium red audio-grade capacitors.

ELNA capacitors are renowned for their exceptional quality and performance, particularly in audio applications. The incorporation of these capacitors into our product will uphold our commitment to delivering the highest standards of performance and reliability.

Rest assured, this change has been thoroughly vetted and tested to ensure it meets our stringent quality standards and does not compromise the functionality or specifications of the product in any way.

We appreciate your continued support and understanding as we strive to maintain the excellence of our products. Thank you for your trust in inno-maker. If you meet any question, please feel free to contact me (support@inno-maker.com).

Warm regards.

Yours Calvin
